Attention: Mr Gregg Howard

Dear Gregg

I am writing this on behalf of our company which has been using your Lanotec products. We have been using Lanotec Oils and Citra Force Citrus Cleaner/Degreaser since 2000 and have been very impressed with the results.

As one of the largest crush sites in Australia (120K ton vintages) we have been using Lanolin Oils on various size chains (5 Membrane Presses, 12 Roto Fermenters, 4 Crusher/Destemmers etc) and Citra Force Cleaner for any hard to clean areas/machines since 2000. At this point, one of our maintenance fitters watched a *Landline* (ABC TV) documentary demonstrating Lanotec products.

The results have been outstanding on the drive chains, in particular on our Marzola continuous presses (we have 12 PDP 1metre presses on site). Prior to using Lanolin we had used many lubricants with varying amounts of success, as well as occasional chain failure. Any lubricants which worked were unsuitable as they were only available in pressure packs and not in bulk, not to mention very expensive and time consuming to apply. By annually immersing the chains in Kerosene followed by immersion in GP Lanolin Oil we achieved outstanding results. We have not had a chain failure since and the necessary lubrication intervals have extended dramatically.

As well as this, the product provides good weather protection in the off season when a lot of our crushing equipment is not required.

Lanotec products have certainly saved us maintenance time as well as downtime. This is easily the best lubricant we have ever used for chains as well as providing unbeatable weather protection.

Regards,

Bruce Ferguson
