

BRISBANE DYNO BIKES

To-

Geoff Boyle

Lanotec Australia

23rd August, 2003

I am employed as head Technician at one of Brisbane's leading motorcycle service centres. I am 11 years in the trade, including 2 years as mechanic in 500cc World Championship Grands Prix.

Since being introduced to Lanotec's range of products over 12 months ago, I have used them at every opportunity. As a mechanic, it is advantageous to have a product range that is both effective and flexible in it's application.

Lanotec's range has become an integral part of our workshop.

The HD-15 and GP-21 sprays and Type A grease have become my all purpose lubricants and waterproofing agent. They have excellent penetrating properties and I have been amazed at the number of uses there are for these products. Some of which include:

- Chain Lubricant (even frees up seized and neglected chains!)
- Cable lubricant
- Lubricant any pivot points (eg: sidestand, clutch/brake, foot pegs etc)
- Waterproofing & anti corrosion agent for electrical connections
- Battery terminal protection
- Anti seizing agent for nuts, bolts and axles
- Tyre fitting lubricant

Because the product is natural and contains no petroleum based agents, I am able to use it on rubber o-rings, which is ideal when reassembling brake and hydraulic systems.

I also use the HD-15 spray as a leather conditioner on my racing leather suit and boots.

In my 11 years as a mechanic, I have not seen or used any other product which can perform all the above tasks.

Regards,

Anton Lafforgue
